numbla gardens, number of entries and the quality of the men entering insures a lively contest. The prizes amount to \$500. This will be the first rock drilling

event in Butte in more than a year.

The bicycle tournament has been set for July 3 and 4, and work is actively progressing on the new track at the athletic grounds. The track is nearly completed and will surely be completed. completed and will surely be com-pleted in ample time for the tourna-ment. It is estimated that the track ment. It is estimated that the track will cost nearly \$5,000, and the tourna-ment will mark the opening of the Wheelmen's Park. Wheelmen will be present from Salt Lake, Spokane and all Montana points to contest for the prizes of \$1,000.

At this stage it seems likely that the Never Sweats will again be entitled to be called the champion baseball club of Butte. It has not yet lost a game this season, keeping up to its enviable record of last year, and all the members of the club seem to be in as good condition as the ever were. condition as the ever were.

condition as the ever were.

Letters were to-day received by Manager Stivers of the Butte Football club from the managers of the football teams of the Denver Athletic club and the Chicago Athletic association, the former suggesting the Saturday before Thanksgiving day for a game at Den-ver and the Chicago aggregation gives its itinerary for the fall games as follows: Denver on Nov. 2 and Salt Lake, San Francisco, Los Angeles, Portland, Butte and Minneapolis, playing in Butte about the latter part of No-vember. The Chicago team has proved itself a four-time winner, having defeated Captain Stagg's famous team of the University of Chicago last year on the University of Chicago last year on three different occasions, the last time by a score of 30 to 0. They have some famous ex-collegiate players, among them being ex-Captain Camp of the University of Pennsylvania, Alvard of Harvard, Hayworth and Henry of Yale and Stevenson of Perdue. A game with them in Butte would draw as large a crowd as the approaching contest with the Omaha eleven, when the capacity of the new grounds now in. capacity of the new grounds now in course of erection in Butte by the foot-ball club will be taxed to its utmost. Photographs of individual members of the Omaha team are expected here daily, and will be placed on exhibition

s soon as they arrive. The Butte men are training faithfully for the coming struggle, and they expect to encounter even a stronger team than that which administered the overwhelming defeat of last fall. Sam Hill, who played in that game, as well as D. E. Heller, both feel that they owe the visitors a grudge which can owe the visitors a grudge which can only be wiped out on a victorious field, and they are trying for place on the

home team.

The new football grounds are nearly completed. The fence, which is the last thing to construct, will be up in a very few days. There are 300 feet of seats in tiers on the west side of the field, so that the sun and wind will be in the below of the spectators.

field, so that the sun and wind will be in the backs of the spectators.

The Walkerville team is lining up against the Buttes every night and serve to give the regular eleven first-class practice. The training of the home eleven is very severe, as they realize that they are to fight the fight of their existence as a team. W. L. Armstrong has been appointed assistant manager and Bert Smith scribe of the Butte club.

Anaconda is one of the best towns in the state of Montana for the enjoyment of a ride on a blcycle. The fight for good roads which wheelmen are compelled to make in other sections of the country before they are able to take any comfort in riding is entirely take any comfort in riding is entirely by the Tailors' union, in an open letter pays a high-compliment to the printers as or
An Eastern page movement afoot among Canadian a. When the control of the last representation in Winnipeg, Man., are uniting together for municipal and legislative reform.

John B. Lennon, general secretary of the Tailors' union, in an open letter pays a high compliment to the printers as or
Montana:

An Eastern page movement afoot among Canadian a. When the lower house of the last representation by Hon. Walter Cooper of Bozeman, as a result of a vote taken all over the state to test the popularity of the various flowers that were suggested. The bill is terse and brief, but covers the ground fully. It is as follows:

House bill 131, introduced by Cooper—An act to provide a Floral Emblem

There are no steep hills to climb in exertion, and then the rider is at the top and may coast back again at ease, and with the comforting assurance that he will not pitch headlong down a precipice or land in a pitch, unless some breakage occurs in his machine or a dog gets in his way. The runs which may be made out of this city are many and offer unusual attractions to cyclers. Gregson Springs, Warm Springs, Butte and Deer Lodge are all accessible to the steed of steel in a very few hours' ride. For an afternoon outing there is no sport more inviting than a run to the springs, where bath and a good dinner put the rider in excellent condition for the return trip, which may be made on wheel or by train, as best suits his humor and

muscular state. The season has scarcely more than opened in Anaconda and yet there are now about 200 wheelmen, whose num-bers are receiving daily additions. A club has been suggested and will doubtless be organized during the summer. The scorchers are anxious to get up a meet and try conclusions in a race for glory and for cash, and the best way for arranging races is to effect an or-ganization to take them in charge. A meeting held in September would be pleasant, and if the proper induce-ments are offered many visitors would come to the city from other towns throughout the state.

That more ladies of the city have not taken up the exercise is a mystery to many as wheeling is more than a craze in eastern cities among the fair. Local dealers account for the backwardness of the ladies by the peculiar conditions here which they think will wear away soon and the best of them will be as enthusiastic cyclers as can be found

A Chicago clergyman, Rev. J. P. Brushingham, has preached a sermon on cycling in which he endorses it from a religious point of view. He says:
"I wish to be enrolled an enthusiast upon the moderate use of the bicycle. It drives away the nervous tension, the hectic cheek, the wearied brain and peevish temper, renders us more agree-able to our friends and serviceable to our chosen calling. By the moderate use of the bicycle the coated tongue becomes normal once again, refreshing slumber and a less discriminating appetite are induced, and those forms of amusement which seem to confuse rec-reation with indoor dissipation are

The bicycle is not only the enemy of the railway corporation and the livery establishment, but also of the all-night saloon and the low-down theater. Enthusiasm for the use, protest for the abuse, constitute the keynote for this

Long flowing robes become a source of danger by being entangled in the wheels. The only suggestion for go to the STANDARD, 21 East Broadway.

********************************* rangements have been tremes. The abuse lies not so much in the costume as in the 'observance' of the silly remarks often made by people take place to-morrow, whom that costume does not directly UTTE, June 22.-All ar- women on this matter is to avoid extake place to-morrow.

Sunday, afternoon at Columbia gardens. The number of entries and deems most becoming and comfortable. "It is no more harmful to ride a wheel than it is to walk or drive in a carriage with your family. I have been pleased to see a large number of wheels in the vestibules of this church during

the hours of public worship.

The use of bicycles in the large cities has materially affected the revenues of street car lines. In Denver the Electric Railway company has made a public statement that the wheels used by suburban residents have reduced their receipts over \$100 per day. Chicago and San Francisco aldermen are consider-ing the advisability of taxing or licensing bikes and the idea seems to be favorably received. In France an annual liceinse is paid by wheelmen. One of the San Francisco aldermen said the other day on this subject: "The fact of the matter is, that the bicycle is super-seding the horse to such an extent that a number of industries which heretofore supported thousands of peo-ple are practically ruined. These are livery stables, hay and feed farms and their agents, the blacksmith, the horseshoer and the carriage and wagon-maker. I am told that fifteen thousand men and women in San Francisco are

"Now, the effect of this is to destroy "Now, the effect of this is to destroy many thosands of dollars' worth of taxable property, and I should say that the wheelmen ought to have no scru-ples against paying a fair license for the use they make of the streets.

riding wheels.

According to the statement of Secretary Bassett of the League of Ameri-can Wheelmen the league is gaining in membership daily. Mr. Bassett predicts that the league will have 65,000 members before the season closes. The membership renewals from May 13 to date are, for Connecticut, 49; Maine, 91; Masachusetts, 1,915; New Hampshire, 23; New York, 2,617; Rhode Island, 72; Vermont, 9. Total for all the states,

[New discovered poem attributed to Edgar A.

Poe. j Sailing over seas abysmal From a world of shame. Once a vessel, strange and dismal-Phantom vessel—came Toward a fairy isle and olden Where ill angels unbeholden Tenanted fate's ghostly golden Fane of Doom and Fame.

Fane of Fame by scraphs builded In the days of yore, There (a temple chased and gilded) From the earthly shore Up to heaven rose it gleaming All with Hope and Beauty beaming (Like a dream of Aldenn seeming -Had it seemed no more!

But the pilot steering For that temple bright, Ever found the island veering From his aching sight, Till, from nightly shores appalling Came the solemn darkness falling. In its hungry clasp enthralling, Land and sea and light.

Then the vessel sinking, lifting Over hopes sublime (Perished hopes!) came drifting, drifting To a wild, weird clime There a visitor undaunted In that desert land enchante Still is seen the vessel haunted

MONTANA'S EMBLEM--THE BIT-TER ROOT.

Written For the Sunday Standard. Written For the Sunday Standard.

It was peculiarly appropriate that the bitter root should have been chosen by the people of Montana as their state flower. The bitter root is essentially a Montana plant and has given name to the most fertile valley, to the grandest range of mountains and to the most beautiful river in the state. Coulter's manual of the flora of the Rocky mountains gives the habitat of the hardy plant as Arizona, Utah, Wyoming and Montana and westward, but nowhere does it flourish so abundantly as in this state and especially antly as in this state and especially in the beautiful valley which takes its name from the plant. Its prolific growth in Montana was noted by the earliest explorers and the chronicle of Lewis and Clarke contains extended reference to the plant, its beautiful blossom and the edible properties of the root.

The plant was named in honor of Captain Lewis, who first noted its exstence. All subsequent explorers of this region mention it and some ref-erence to it is contained in nearly every chronicle that has ever been written of this section Granville. written of this section. Granville Stuart in his little book, "Montana as It Is," gives the following description of it in a note to the dictionary of the

May, when it is at its best, and it. It will then keep for years if

is lewisia rediviva, the specific portion of the name referring to the wonderful tenacity of life which the roots pos-sess. If placed in water after having sess. If placed in water after having been out of the earth for months, the root will revive and a new growth will at once commence. In this respect it resembles the celebrated resurrection plant of the Colorado deserts. In appearance the plant is a little tuft of densely clustered leaves. It is among the earliest plants of this region to start in the spring and in June the Missoula and Bitter Root valleys are transformed into a vast garden by the beautiful pink flowers which dot the fields and footbills, like stars in the fields and foothills, like stars in the

All old-time Montanans are familiar with the plant and most of them have in the quotation from Mr. Stuart's book, the root is gathered for food pur-poses in May, before it has blossomed. The root is then full and plump and dried it for a winter store. In this form it was treated just as dried fruit is, first soaked and then boiled.

There seemed to be much difference of opinion as to the taste of the root. Mr. Stuart states that it is very bitter and not very palatable. Judge Woody has told the writer that the bitter taste is very slight and not at all disagree-able. Cooked in milk, he said, it loses the bitter taste and is a pleasant arti-cle of food. Others have made the same statement and still others agree with Mr. Stuart. It is probably like all other food stuff. What some people

Lewisia Rediviva (Bitter Root) shall be the floral emblem of the state of Mon-

Sec. 2.—This shall take effect and be in force from and after its passage. Certainly, no more beautiful flower could be chosen. The bright, shell pink of the blossoms makes it one of the most attractive flowers that grow in Montana. Then there is a volume of suggestiveness in the properties of the plant. Its early growth, its persistent life, its nutritious properties, its bril-liant blossoms—all these are full of suggestions. Montana could have chosen no flower more appropriate to represent her matchless resources and her sturdy citizenship. Missoula, June 22, 1895.

PAINTER AND POET. They Were Close Friends, but Are Not so Any More.

evidence of mutual esteem.

As a rule, the two young men didn't discuss art when they met, for they

"You can't see anything but your

not know each other. Right to Carry It. From the Louisville Courier-Journal

Chinook jargon:

"'Kon-ah'—'Bitter Root,' a small plant having a very pretty flower in June. The root is about three inches long and one quarter of an inch in diameter, and very often forked. It grows in many of the valleys in the Rocky mountains, but it particularly abounds in the Bitter Root valley, which takes its name from this circumstance. It forms no inconsiderable item of food among the Indians. The Flatheads in particular dig large quantities of it (that is, the squaws do) in May, when it is at its best, and dry it. It will then keep for years if kept Chinook jargon:

It is very nutritious, but has an exceedingly bitter taste, hence its name. I never could eat it, unless very hungry, but many of the mountaineers are very fond of it."

The botanical name of the bitter root firmament.

used it as an article of food. As stated tough skin is easily separated from the edible core. This core is smooth and glistening white and is boiled in milk or water to prepare it for eating. It formed one of the staple articles of the diet of the Indians before the introduction of wheat. They

Be it enacted by the Legislative Assembly of the state of Montana:

Section 1.—The flower known as

From the Chicago Record. A south side young man who some times writes verses had a friend who

often paints pictures.

Each of them, in additon to having a youn g wife and a very young baby, was satisfied that his particular branch of art was the most successful medium for the expression of the finer feelings. The two families lived in neighboring flats and were always very friendly. The wives chatted together about the best brand of baby food and the children rolled about on the floor and clawed each other's noses-the highest

knew that they couldn't agree on the subject. So they argued on the silver question, for neither of them knew any thing about it.

One evening the young man who

"I'm writing some verses about my aby," said the first young man.

"Agreed," responded the artist read-

The two families gathered one evening to hear the poetry and view the picture. First each father showed

artist. Then they drew long breaths and the poetry young man read his peem about his friend's baby and the artist showed his picture of his friend's baby.

There was a silence.
"You didin't catch the delicate sug gestion of intellectuality in my baby.

And then there were other words of similar character, only more emphatic.

Presently the wife of the poetry
young man gathered up her baby and
went home, followed by her husband.
Since that time the two families do

HIS FIDDLE SAVED HIM. The Old Negro Showed That He Had

Several nights ago as Patrolman Charles Rommel was patroling his beat he discovered an old darkey walking down the street with a violin under his arm. When he had gotten even with him he stopped him and began questioning him. The policeman was not satisfied with the negro's account of where he had gotten the instrument and he placed him under arrest. The and he placed him under arrest. The negro went on without a word, and at the station gave his name as James McCloskey. The next day he was presented before Judge Smith. The policeman told the judge how he had seen the negro on the street with the instrument, and he said that he did not believe it belonged to him. It was a fine vicility he gold and a prographate a fine violin, he said, and a negro that had no more money than this negro seemed to have could not afford to buy such a fine instrument. The policeman finally asked the judge to give him two days to look for the owner of the vio-lin, saying that he believed in that time he could be able to locate its own-

er. The time was granted him and the negro was held over. Yesterday he was again presented before the court. Those against him tried to make out a felon case, as they said that the violin was worth considerably over \$20. The violin was worth \$40 or perhaps \$50. During the course of the trial the policeman told the judge that the negro had admitted to him that he could not play on the instrument, and that was one reason he made the arrest, as he knew that a man would not pay a large sum for a thing he could not use. Up to this time the prisoner had re-mained silent. He had sat with down-cast eyes and did not seem to hear what was going on. When he heard this he suddenly looked up and said:

"He's mistaken, yo' honor; I didn't say that I couldn't play on the violin." The judge remained silent for a moment, and then asked that the instru-ment be handed the negro. A light came in the darkey's face as he took the instrument into his hands. He looked it over carefully and then fon-dled it under his arm. He then took it from under his arm and began to tune it. He had scarcely struck the first note when the crowd in the court room began to stir and move up closer to the prisoner's dock. In a few moments the instrument was tuned, and ments the instrument was tuned, and in the sweetest strains the "Arkansas Traveler" echoed and re-echoed through the court room. The crowd began to pat their feet in time with the music, and the judge had to order the negro to stop playing. While the bled and his eyes shone with an unbled and his eyes snone with an un-usual brightness. It was with reluc-tance that he stopped playing, and the crowd looked disappointed. The negro sat still for a moment, but he could stand it no longer. Again he placed the violin to his shoulder and began playing "I'se Gwine Back to Dixie." The crowd in the court room could contain themselves no longer, and it was with difficulty that order was restored. Again the negro was stopped from playing. The judge looked at the prosecuting attorney and then at

"Do you say this man cannot play?" he said. The arguing of the case was finished and the negro was dismissed.

IN A WARM CLIMATE. ome of the Discomforts of Living in a Place Like Guerrero. From the Boston Herald.

F. R. Guernsey, describing in the Boston Herald a visit to Guerrero, says that the tarantula is sometimes found there as big as a man's two fists. Scorthere as big as a man's two lists. Scor-pions are of all sizes, but the one which does the most barm by its bite is a smallish gray creature. The larger ones bite so hard that the blood flows freely, and the infected poison flows off. There is a little snake called the corallilo, which is particularly fond of getting indoors and nesting in one's boots. Its bite is fatal. Boots should always be inspected for corallilos before they are put on-in Guerrero. If a scorujon creeps on the face or hands, the so visited should carefully refrain from so visited should carefully refrain from making any movement; he should al-low the horrible insect to crawl just where it will. If it is not disturbed, in all likelihood it will do no harm; if it is attacked it is quite sure to sting. The worst terror to the people of Guer-rereo is neither snakes nor scorpions, but the red ants. Before these insects the people flee in terror from their houses. They leave nothing behind if houses. They leave nothing behind if they can help it. An Indian woman rushed out of her cabin with her children on the coming of the ants being announced. In her terror she left her baby behind the house swinging in a hammock. It was hoped that it would escape; but when the ants had departed the mother found that the insects had crewt down the cords of the hammock and had left of the unfortunate child and had left of the unfortunate child nothing but its bones. On some of the Guerrero sugar estates great lazy-look-ing snakes are kept in the store rooms to keep rats and mice away from the sugar loaves. These snakes are repulsive in appearance, but harmless to human beings. Not all the places in Mexico, however, which have an agree able climate are cursed with insects and reptilian pests. Such places as Cuernavaca, in the state of Morelos, are too high above the hot plains to suffer from venomous insects, and yet so much below the cold tableland that the climate is a perpetual summer. Cuernavaca unites many of the advantages of the temperate zone with all that is delightful and alluring in the
